

Objective

Both air quality and noise legislation are a major concern for human health in the EU. By addressing the issues that may be relevant for national judges, this two and a half day workshop will provide the participants with an overview of the Air Quality Directive (AQD) and the Environmental Noise Directive (END). In so doing, it aims to facilitate the handling of future national court procedures invoking non-compliance with EU air quality and noise legislation.

Key elements of the workshop

- Scientific and technical introduction to the effects of air and noise pollution on human health
- Aims and features of the AQD and END and their links with other relevant EU legislation
- Various case studies on the role of the judge in this matter

Who should attend?

Judges from all EU Member States who are interested in environmental law.
